Due to the continuing problems with ammunition supply, the current economic problems along with personnel and health issues, we are closing 22 ammo.com until November 1st, 2010. All orders placed during August and September are cancelled and all charges are reversed. Those with partial orders that have been delivered will be receiving the remaining items within the next weeks. With 24 years in the firearms industry we have no intention of going under, but we need to make some changes and updates to continue and that is the reason for this time of reconstruction. We would like to take this time to thank our past and current customers for their business and ask for your patience and understanding during this time.

Tim Ragland
